

Polla Vishnu Vardhan

8523851643 | vishnumaxpolla32@gmail.com |
Hyderabad, Telangana, India

EDUCATION

Aurora Deemed to be University

Bachelor of Technology in Artificial Intelligence and Machine Learning

Hyderabad, India

Sept 2023 – Sept 2027

Sri Chaitanya College of Education

Intermediate, Mathematics-Physics-Chemistry (MPC)

Hyderabad, India

Sept 2021 – May 2

Grade- 99.5

Bhadrachalam Public School & Jr College

High School/Secondary Education (CBSE)

Hyderabad, India

June 2014 – Mar 2021

Grade- 8.85 CGPA

TECHNICAL SKILLS

Languages: Python, HTML, CSS, JavaScript, My SQL

Frameworks & Libraries: Bootstrap, React, TensorFlow, scikit-learn, pandas, NumPy, Mat plot Lib

AI/ML: LLMs, Generative AI

Tools: Git, GitHub, Stream lit, Jupyter, VS Code, Anti-Gravity, Canva, Cap Cut

Core Competencies: DSA Basics, Problem Solving, Front-End Development, Video Editing, UI & UX

PROFESSIONAL EXPERIENCE

Full Stack Development Intern

Company Name- **Nirvaha** (Wellness LLP)

Feb 2026 – Apr 2026

Hyderabad, India

- Developing responsive user interface
- Managing backend services and databases
- Working with technologies like HTML, CSS, JavaScript, and React

AI/ML Intern

Company Name- **VISWAM.AI** (IIT Hyderabad)

May 2025 – Aug 2025

Hyderabad, India

- Contributed to cutting-edge AI/ML research and development projects at IIT Hyderabad incubated startup
- Collaborated with research teams on innovative AI solutions and generative AI applications

Web Development Intern

Company Name - **CodSoft**

May 2025 – July 2025

Hyderabad, India

- Developed responsive web applications using HTML, CSS, JavaScript, and Bootstrap framework
- Implemented front-end features with focus on user experience and performance optimization
- Collaborated in agile development environment utilizing Git version control

Python Development Intern

June 2024 – Aug 2024

Company Name - **Cognifyz Technologies**

Hyderabad, India

- Developed Python applications focusing on data processing, automation, and analysis
- Implemented algorithms and data structures to optimize code performance and efficiency
- Worked with Python libraries including pandas, NumPy for data manipulation tasks

C/C++ Development Intern

Company Name - **Cognifyz Technologies**

June 2024 – July 2024

Hyderabad, India

- Implemented complex algorithms and data structures using C/C++ programming
- Optimized code for memory management and computational efficiency
- Developed understanding of low-level programming and system architecture

PROJECTS

StudLyf: Built an AI-powered career development platform featuring mock interviews, technical assessments, and portfolio/resume building to bridge the gap between learning and employment.

Machine Learning Projects: Developed end-to-end ML pipelines including data preprocessing, model training, and deployment using Python and scikit-learn

Portfolio: Developed a responsive portfolio web application using React and Bootstrap to showcase skills, projects, experience, and achievements with a focus on UI/UX and performance.

Startup Copilot: Built an AI-powered co-founder tool for early-stage builders during the Aya Community Hack the Vibe Hackathon (36-hour challenge).

Generative AI Applications: Built applications leveraging LLMs and generative models for content creation and automation

Frontend – Development Project: Developed a frontend-based online examination system with role-based dashboards, interactive quizzes, autosave, analytics, and browser-level proctoring features to ensure exam integrity.

RESQ360: Developed an emergency response system using sensor-based detection and real-time coordination to ensure rapid medical assistance during accidents.

Full-Stack Web Applications: Created responsive web applications with React frontend and Node.js backend with MySQL integration

XAI Chatbot: Built a full-stack Explainable AI chatbot using TF-IDF and Logistic Regression to classify student queries and deliver transparent, interpretable responses.

ShipOrShame: Built a high-stakes productivity dApp on Monad Testnet enabling users to commit, stake, and ship tasks or face penalties.

Video Editing Portfolio: Created professional video content using modern editing tools demonstrating creativity and technical proficiency

ACHIEVEMENTS

- Won Best Hack in Open Innovation in BuildWith organized by HackPrix, CodeforChange, Starknet Foundation.
- Secured 2nd place at Monad Blitz Hyderabad, organized by Monad Foundation and Hyderabad DAO, for the project ShipOrShame.
- 2nd Runner-up in DATANYX for the Best Project in MedTech Domain organized by Muffakham Jah College of Engineering and Technology, AWS, SMC.
- Won 1st Prize in Agentic AI Hackathon organized by AI Innovators Club, Aurora deemed University.
- Won 1st Prize in Mini Hackathon: Code Battle organized by Game Development Club, Aurora deemed University.
- Best Club – CodeVerse Club Recognized for consistent contributions, technical excellence, and leadership within the club.
- Elected Class Representative, demonstrating leadership, communication, and organizational skills in coordinating between faculty and students.
